## DENTASONIC SS MEASURING GAUGE

**MG-6** 6 thicknesses (0.1mm, 0.15mm, 0.2mm, 0.3mm, 0.4mm, 0.5mm)

# STRIPPING

## AIRO STRIPS

An innovative interproximal reduction system that makes interproximal enamel removal safer and more accurate without creating sharp corners or subgingival ledges. Designed for use with all orthodontic treatments, these strips curve and flex along the natural contours of the teeth to avoid cutting lips and gums, to prevent excessive enamel removal, and to maximise patient comfort.

- Stainless steel strips with high quality diamond powder
- Medical grade plastic casing
- Single-handed, ergonomic design reduces hand fatigue
- Effective for anterior teeth and easy access to posterior areas
- User and patient friendly
- Autoclavable up to 140°C (steam heat only)

	Yellow IPR 0.06mm Single-Sided, Extra-Fine Diamond Serrated. Sold in pack of 8.	<b>DB05-0900</b>
	Red IPR 0.12mm Double-Sided Medium Diamond. Sold in pack of 8.	<b>DB05-0901</b>
	Dark Blue IPR 0.15mm Double-Sided Coarse Diamond. Sold in pack of 8.	<b>DB05-0902</b>

**700-116**  
10 tips,  
1 handle

**Molar Pad**

**700-007**  
10 tips,  
1 handle

## IXION ALIGNER PLIER

**Aligner Kit IX886**

this kit contains

- IX887 Torque plier
- IX888 Rotation plier
- IX889 Retention plier
- IX891 Hole Punch plier
- IX890 Tear Drop plier

# ALIGNER PLIERS

## IX887

### The Torque Aligner Plier

The IX887 creates a horizontal indentation (0.75 x 1.5mm), creating a force point for individual lingual or labial root torque.

## IX892

### Ixion Aligner Scissors

These lightweight scissors are used for removing excess thermoformed material, and for the smooth trimming and shaping of aligners. Their streamline design, graduated curve and tapered beak makes for easy use - even in tight areas.

## IX889

### The Retention Aligner Plier

to create a circular indentation (1mm).

## IX888

### The Rotation Aligner Plier

The IX888 creates a vertical indentation / force point (0.75 x 1.5mm) on the tooth surface to optimise tooth rotation.

## IX891

### The Hole Punch Plier

Creates a half-circle cut-out in the aligner to give clearance for bonded buttons, tubes or brackets with hooks for elastics.

## IX890

### The Tear Drop Plier

Create a cut at the gingival margin, anywhere along the arch - buccally, labially or lingually - to conveniently hold elastics in place while the aligner is placed in the mouth.

# ALIGNER SUPPLIES

## G-PREMIO BOND

- Stabiele hechting op glazuur, dentine, composiet, edele en non-edele legeringen, zirkonium en alumina.

- 012694

- Composition unique permettant une adhésion élevée sur tous les substrats indirects (composites, métaux précieux et non précieux, alumine, zircone...)

- 012694

## GC ALIGNER CONNECT™

### Specifically formulated for aligner attachments

Als eerste in de industrie is GC Aligner Connect speciaal ontwikkeld voor orthodontische aligner attachments. GC Aligner Connect biedt een verbeterde esthetiek, imiteert de glazuur kleurschakeringen van de tand en heeft een hoge duurzaamheid, die slijtage op lange termijn of mogelijke loslating beperkt tijdens de behandeling. Kan gebruikt worden in combinatie met de G-premio Bond, Ortho Solo of Assure.

90-4100-0000 GC Aligner connect - 1 syringe 3,4g with 20 tips

### Composite développé pour les traitements par gouttières

La résine composite généralement utilisée pour créer des taquets ne répond pas aux impératifs des traitements par gouttières d'alignement. Aucune résine existante sur le marché n'a spécialement été créée pour cette application. GC Aligner Connect a été développé dans ce sens, afin d'apporter une réponse esthétique par mimétisme de la teinte de la dent et limiter l'usure et les risques de décollement grâce à sa grande résistance. L'adhésion à l'émail se fera par l'intermédiaire d'un agent de collage photopolymérisable (ex: G-premio Bond, Ortho Solo, Assure, etc...). Suivre les instructions de l'agent de collage.

90-4100-0000 GC Aligner connect - 1 syringe 3,4g with 20 tips

## PERFECT-A-SMILE

### Perfect-a-Smile, een pontic verf voor aligners

Is een licht uithardende pasta in 3 tinten die op elk type aligner kan worden aangebracht om een ruimte of een ontbrekende tand te maskeren.

### Perfect-a-Smile, une peinture pontique pour les gouttières.

Une pâte photopolymérisable en 3 teintes qui peut être appliquée sur tout type de gouttière pour masquer un espace ou une dent manquante.

**PPA2**  
Shade A2 - 4gm  
**PPA35**  
Shade A3.5 - 4gm  
**PPAB1**  
Shade B1 - 4gm

## GOTO

is een lichtuithardende lijm met superieure verwerkingseigenschappen.

### Klinische toepassingen

- Hechting van bracket en tube
- Bevestigen van vaste linguale retainers
- Hecht alle metalen, keramische en composiet attachments
- UV-lichtgevend middel - fluoresceert op de tand

est un adhésif à réticulation légère avec des propriétés de manipulation supérieures.

### Applications cliniques

- Collage brackets et de tubes
- Collage d'un appareil de rétention linguale fixe
- Collage de tous les attachements en métal, céramique et composite
- Agent de divulgation UV - fluorescent sur la dent
